Sean and Davis,

Here is the daily report for Friday on the oversight of the surface sediment sampling. The fish acoustics receiver testing was also completed on Friday (see daily report that Madi Novak submitted yesterday). For the weekend we have two staff covering oversight on the sediment sampling boats and are planning to add a third oversight staff on Monday when the fish acoustics study fish tagging work starts up.

I have also attached a running summary of the GPS position checks that we have been recording since their new SOP using benchmark PH2 was implemented. From our observations their GPS systems are meeting the 1-2 meter accuracy specification. But we have not yet received any of the prior GPS position check data measurement data (was requested in the 4/10/2018 email to the PreRD Group).

Please call me if you have any questions.

Thank you,
